PROFILE

I hold a University Technician degree in Programming from the National Technological University (UTN) in Mar del Plata (Argentina).

I'm passionate about software development, problem-solving, and teamwork. I'm committed to continuous improvement and the practical application of my programming knowledge.

WORK EXPERIENCE

Game Store - View on GitHub
- Console application developed in C demonstrating my knowledge of binary file handling, trees, linked structures, composite data structures, and recursion.
- The program organizes games by genre using a tree-based structure and loads/saves data through binary files.

Music Player - View on GitHub

- Java project inspired by Spotify, created to showcase my skills in Object-Oriented Programming (OOP), JSON handling, Collections, Exception Management, and Swing for graphical interfaces.
- The application simulates playlists, favorite songs, and user interaction within a lightweight desktop environment.

E-Commerce - View on GitHub
- E-commerce web platform developed as a final project, featuring a simulated backend using JSON Server and integration with the Mercado Pago API to provide secure payments for users and sales management for the administrator.
- The project highlights my skills in frontend development, API integration, data handling, and UI design, delivering a functional and intuitive shopping experience.

EDUCATION

National Technological University (Universidad Tecnológica Nacional - UTN)

University Technician in Programming

2023-2025

TECHNICAL SKILLS

- JavaScript - HTML - CSS
- Java
- C
- SpringBoot
- Angular
- Git / GitHub
- Postman
- MySQL
- TypeScript
- Jira

SOFT SKILLS

- Leadership
- Teamwork
- Communication
- Problem solving
- Agile Methodologies
- Adaptability

ADITIONAL INFORMATION

- Languages: Native Spanish, English B1, Basic Italian
- LinkedIn
- GitHub
- Portfolio
